

Azumo Dev Kit Quick Start Guide

Kit Components

This Guide USB Cable FLP Dev Kit Board

Quick Start Procedure

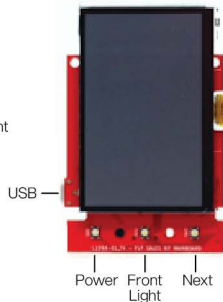

- Connect the supplied USB cable into the board's Micro USB Connector
- Connect the other end of USB cable to a USB power supply (*Computer, USB hub, or smartphone charger*)
- The display will start up and go through the pre-recorded image sequence
- Toggle the LED on and off by pressing the 'Front Light' button
- Images can be skipped manually using the 'Next' button
- Holding the button down for 3 seconds will resume the automatic sequence
